VR TRAINING AND PROFICIENCY CHECK FOR AERODROME AND HANDLER (ADR.OR.D.017)

Combines high-spec virtual reality software within standard training for ground operations. Complement theoretical knowledge with effective practical training in a very realistic environment, without disrupting active operations on the ramp.

Due to regulation we offer training and proficiency check using modern simulation and VR technology for the following items:

- AMC1 ADR.OPS.B.016(b)(1) Foreign object debris control programme
- AMC3 ADR.OPS.B.024(b) Authorisation of vehicle drivers
- AMC2 ADR.OPS.B.024(b) Authorisation of vehicle drivers
- AMC1 ADR.OPS.B.080(Training and proficiency check programme for marshaller and follow me)

Our technology is portable and we can install it everywhere.

Contact us for a quotation

ADVANTAGE OF SIMULATION OR VR TRAINING

- Dangerous and noisy training airside environment
- Difficult to train at night or during adverse weather conditions
- No aircraft and GSE available
- Airside access passes take time to be issued. Trainees cannot experience airside for several weeks after theoretical training.
- Abnormal scenarios are difficult to replicate in live operations

WE CAN SIMULATE THE OPERATION DURING NIGHT, DAY, FOGGY DAY.... EMERGENCY SITUATION
